

Dengxin(Eric) Wang

U.S. Citizen | Active Secret Security Clearance | eric.xinw1@gmail.com | [linkedin.com/in/ericxin](https://www.linkedin.com/in/ericxin) | github.com/easxin

SUMMARY

Active Secret-cleared Software Developer with 3+ years of experience building and modernizing enterprise logistics and financial applications using C#/.NET, React/TypeScript, SQL Server, REST APIs, and microservice-based architectures.

TECHNICAL SKILLS

Languages: C#, JavaScript, TypeScript, SQL, Java, Python **Databases:** SQL Server, PostgreSQL
Frontend: React, Kendo UI, HTML, CSS **Backend:** ASP.NET Web API, REST APIs, Entity Framework, LINQ
Tools: Git, CI/CD, Swagger, Postman, SonarQube, Sourcegraph Cody, Claude Code
Messaging & Architecture: RabbitMQ, Microservices, Modular Monoliths, Event-Driven Architecture

PROFESSIONAL EXPERIENCE

Leidos Mechanicsburg, PA
Software Developer II - Enterprise Logistics Management System (ELMS) Dec 2023 – Present

Worked on **large-scale enterprise logistics systems** supporting government and **defense-related operational workflows** in a **cleared environment**, contributing to API development, legacy system modernization, React/TypeScript UI workflows, and SQL Server data-access logic.

- Implemented **end-to-end inventory-related workflow enhancements** across multiple enterprise logistics applications, spanning React/TypeScript frontend state management, ASP.NET Web API integration, SQL Server data access, and event-driven backend processing across **4+ application layers**.
- Optimized enterprise data retrieval by refactoring LINQ/Entity Framework query logic, **reducing grid load time by 80–90%, from 10+ seconds to 1–2 seconds**.
- Improved reliability of complex React/TypeScript and Kendo UI workflows by **preserving user selections across grid interactions and refresh behavior**, reducing selection-loss issues in multi-step workflows.
- Designed and delivered a **reusable React component for a shared UI component library**, reducing duplicated frontend implementation effort and supporting reuse across internal applications.
- Supported **root-cause analysis for integration and deployment issues** by collaborating with senior developers, QA, and **DevOps** while troubleshooting environment-specific failures, messaging-related errors, package/version mismatches, and application/database log findings across frontend, backend, database, and deployment layers.

Wiley Edge Plano, TX
Software Engineer Contractor | JPMorgan Chase & Co. CIB Jul 2022 – Mar 2023

Worked on **enterprise financial applications** supporting reporting, data processing, and legacy application functionality within an Agile Scrum team.

- Improved legacy application data-loading performance by refactoring SQL queries and batch-processing logic, **reducing processing latency by over 90%, from approximately 2 minutes to 10 seconds**.
- Contributed to an **ASP.NET reporting tool using C#** to integrate with enterprise data sources and support recurring internal reporting workflows for downstream teams.
- Added **NUnit tests** across multiple applications to improve regression coverage, support code-quality validation, and strengthen application reliability across release cycles.

PERSONAL PROJECTS

Cloud-Hosted Personal Portfolio Website | easxin.dev May 2026 – Present

- **Built and deployed** a responsive React/TypeScript portfolio website on **AWS** using **S3** and **CloudFront**, with SPA routing support, HTTPS/custom domain configuration, and cloud-hosted static asset delivery.
- Implemented a **serverless contact** form with **API Gateway**, **Lambda**, **DynamoDB**, and **Amazon SES**, including input validation, message storage, email notification, **CORS** configuration, bot filtering, and **DynamoDB-based** rate limiting.

EDUCATION & CERTIFICATIONS

Eastern University St. Davids, PA
Master of Science in Data Science, GPA: 4.0/4.0 | Certificate in Data Science May 2024 - Jul 2025
University at Buffalo, The State University of New York Buffalo, NY
Bachelor of Science in Computer Science Aug 2016 - Dec 2019
Udacity – AI Programming with Python May 2025
Udemy – AZ-900 Microsoft Azure Fundamentals (Training) May 2024
