

Dengxin (Eric) Wang

New York, NY | 347-399-3665 | eric.xinw1@gmail.com | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

U.S. Citizen and Software Developer with 3+ years of enterprise application experience and an Active Secret Security Clearance

TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript, SQL, Java, Python

Frontend: React, HTML, CSS, Kendo UI

Backend: ASP.NET Web API, REST APIs, Entity Framework, LINQ

Architecture & Messaging: RabbitMQ, Event-Driven Architecture, Microservices, Modular Monoliths

Cloud & DevOps: AWS, Docker, Kubernetes, CI/CD, Azure, Git

Tools: Swagger, Postman, SonarQube, Claude Code, Sourcegraph Cody

WORK EXPERIENCE

Leidos

Mechanicsburg, PA

Software Developer II - Enterprise Logistics Management System

Dec 2023 – Present

Contributed to **large-scale U.S. Army enterprise logistics systems in a cleared environment**, supporting warehouse, inventory, transportation, and supply-chain workflows through **ASP.NET Core API development, React/TypeScript UI enhancements, SQL Server data-access logic, and legacy system modernization.**

- Designed and implemented the integration of a **RabbitMQ-based event-driven workflow** from a **microservice** into a **legacy monolithic logistics application**, decoupling inventory processing from existing logic and enabling **asynchronous execution without disrupting legacy functionality.**
- Optimized inventory grid performance by building a **custom WhereIn LINQ extension** and pushing **Entity Framework filters** into **SQL Server before materialization**, reducing grid load time from **10+ sec to 1–2 sec.**
- Implemented **Redis caching for inventory-type dropdown data**, querying **SQL Server only when lookup criteria changed** to reduce redundant database reads and improve grid responsiveness.
- Built a reusable, **configuration-driven Enterprise Rollup React component** with **dynamic cascading filters**, generalizing it into the **DLMS frontend library** for cross-team reuse and standardized **DLMS transaction-file search workflows.**
- Supported **production stability** by troubleshooting **cross-layer issues** across application, database, messaging, and deployment environments, using **logs, debugging, and release validation to verify stable deployments.**

Wiley Edge

Plano, TX

Software Engineer Contractor at JPMorgan Chase & Co. CIB

Jun 2022 – Mar 2023

- Replaced **row-by-row report processing** with **batch-processing logic** and optimized SQL queries, reducing legacy financial reporting latency by **over 90% from approximately 2 minutes to 10 seconds.**
- Enhanced **C#/ASP.NET reporting workflows** using **centralized data warehouse sources** and automated daily report delivery through a **scheduled shell script task**, reducing manual effort for **daily securities reporting.**
- Built a **project-wide NUnit automated test suite** for a legacy C# application, increasing **SonarQube coverage to 65%–70%** and reducing code quality and vulnerability findings to improve release readiness.
- Supported **UAT deployment validation** through **Jenkins release processes**, assisting with environment checks, troubleshooting, and **Docker-based runtime verification.**

PROJECTS

Cloud Hosted Personal Portfolio | React, TypeScript, AWS |

May 2026 - Present

- Designed and deployed a **serverless portfolio application on AWS** with S3 static hosting, **CloudFront CDN, Route 53 custom domain, ACM HTTPS, API Gateway, Lambda, DynamoDB, and SES.**
- Built a React/TypeScript single-page frontend with custom domain routing, HTTPS support, CloudFront distribution, and **SPA fallback handling.**
- Implemented a **serverless contact workflow** with request validation, **DynamoDB persistence, SES email notifications**, CORS configuration, spam prevention, and rate limiting.

EDUCATION & CERTIFICATIONS

Eastern University: M.S. in Data Science, GPA: 4.0/4.0 | Certificate in Data

May 2024 – Jul 2025

University at Buffalo: B.S. in Computer Science

Aug 2016 – Dec 2019

Certifications: AI Programming with Python (Udacity); Microsoft Azure Fundamentals (AZ-900 Training)
